

Data Discovery OnDemand

Deliver Analytics to Everyone. Fast.

Bring together all of your data sources and empower Power BI Users to easily locate and utilise enterprise wide data and share insights with highly targeted audiences.

Data Discovery OnDemand allows the rapid creation of a cloud-based centralised analytics platform. Business Users can search or browse a central analytics web-based hub that houses all enterprise data assets and targets the right content to the right audience enterprise-wide.

- Central point of access for all existing enterprise data whether on-premises or in the cloud
- Data Warehouse framework suitable for analytical discovery
- Enterprise Analytics Portal to share insights across teams easily
- Power BI delivered to the right audience, every time

Faster time to Insight

- Onboard data in a matter of minutes
- Minimized processing time
- Central hub for accessing data from multiple systems
- Automatically retain all historical changes to data over time
- Automated Reconciliation

Bring together ALL your data

Targeted Analytics

- Central Analytics Portal allows you to quickly and easily target content
- Seamless Power BI Integration empowers users to create, publish and target reports from a single location

The right content to the right people

Ease of Discovery

- Governed taxonomy allows you to tag common business terms against reports
- Enterprise Analytics assets organized by business structure and terminology
- Targeted content lets users find exactly what they are looking for without the noise

Discover Relevant Insight

"Microsoft and BizData have enabled tourism Australia to drive real time decision making on campaign performance and investment. As a result TA is now equipped to better market Australia to the world with recent growth of over 8% in international arrivals."

John Mackenney, CFO of Tourism Australia.
